

# DRAG BAGS

The sturdy Barrett Drag Bag is made of 1000 denier Cordura and is fully padded with closed cell foam for weapon and scope protection. The innovative design allows the bag to be opened into a padded shooting mat or be carried backpack-style with built in shoulder straps and waist harness. Non-skid elbow rests enhance shooting from prone and also shield the case from a hot barrel. All Zippers are dust and water proof #10 YKK with dual sliders, and the interior has three 1.5" wide nylon straps with Silent Side Release buckles for securing your rifle. Four zip-closed M82A1/M107 10-Round Magazine Pouches are sewn into the interior of the bag, which also serve to protect laser rangefinders,

binoculars, or additional boxes of Barrett ammunition. The outside of the bag has three rows of webbing loops for additional camouflage. Drag loops on front and top of bag allow bag to be pushed or pulled through the brush. A modular full-length cargo compartment has been added to contain any necessary equipment a sniper could need. This compartment has two removable dividers to configure the case according to the operational needs of the shooter, and also contains a 7"x10" flap pocket for smaller items such as a data book or maps. This quality piece of field gear fits the Barrett M99, M95 and M82A1/M107 models (fully assembled).

## Specifications and Features
