

BORS

The Barrett Optical Ranging System (BORS) is an integrated electronic ballistic computer that mounts directly on select riflescopes and couples to the elevation knob. Just turn the elevation knob until the LCD displays the target's known range. Three internal sensors automatically calculate ballistic solutions. It compensates for uphill and downhill shooting, temperature, and barometric pressure changes.

BORS is available by itself or factory installed on the Mark 4 4.5-14x50mm M1 Mil Dot scope. It's pre-set with over 100 various cartridges and loads. Kit includes the software and data cable to program custom loads on a PC and is transferrable directly to BORS.

Compatible Scopes:

Leupold: Mark 4 3.5-10x40mm LR/T M1, Mark 4 4.5-14x50mm LR/T M1, Mark 4 6.5-20x50mm LR/T M1, Mark 4 6.5-20x50mm ER/T M1, Mark 4 8.5-25x50mm LR/T M1, Mark 4 8.5-25x50mm ER/T M1
