News From Barrett®

Coast Guard Orders More Barrett® M107® Rifle Systems

The United States Coast Guard has ordered additional Barrett M107 rifles for their continuing missions of drug interdiction and Homeland Security. These new M107 rifles add to the weapons that have already been deployed in the last two years. The USCG rifles differ from the standard US Army M107 in that they have fully chromed bores and carry special anti corrosion finish. The order will be delivered at the contract price and by the requested ship date. Barrett Firearms Manufacturing Inc. is the designer and manufacture of the M107, .50 BMG, Long Range Sniper/Anti Material rifle used by all US Military Services and 58 of our Allied Armies.
