

# BARRETT FIREARMS ExRings

Barrett ExRings™ with Pin-Lock™ technology is a dual setting MOA extended range ring set. Along with Barrett's ZERO-GAP™ technology, ExRings provide definitive holding power for heavy scopes under the harshest recoil. ExRings maximize the riflescope's precise internal elevation adjustment by angling the scope without compromising the rigidity of a one piece mount. Works on flat and tapered Mil-STD 1913 rails with scopes having up to a 70mm objective lens. Adjust between 15 MOA and 40 MOA taper by simply removing the rear pin from one hole and inserting it into the other. The 7075 T6 components are hard anodize coated in black to mil spec MIL-A-8625 Type III Class 2 specification for superior surface hardness. Steel components are manganese phosphate coated to mil spec DOD-P-16232 Type M Class 2 specification.

The unique scope clamping design of Barrett ZERO-GAP rings takes care of some old optics mounting challenges. In the past, great attention was required when securing scope ring caps to maintain an equal gap between the lower ring and top cap on each side. There was also the possibility of rotating the scope out of perfect vertical reticle alignment while torquing the cap screws in a side to side pattern. These problems are eliminated with the ZERO-GAP design. Simply secure the cap on the indicated side until there is no gap between lower ring and cap, check for perfect reticle alignment, and then torque the remaining side to the required specification. Barrett ZERO-GAP rings are available in four different heights. From a low mounted action hugging scope on a hunting rifle to a high mounted large objective optic on a tactical rifle, you are sure to find one for your particular application.

## Specifications

Weight:	8.32 oz
Size:	30mm
Base Type:	Mil-STD 1913 Rail
Tensile Strength:	83 ksi
Ring Width:	1.2"
Surface Gripping Area:	8.192 inch <sup>2</sup>

Material:	7075 T-6 aluminum
Finish:	Hard anodized black
MOA Settings:	15 MOA or 40 MOA
Height: Measured from contact point of the rail to center line of the scope ring	1.6"

Part #	ExRings with ZERO-GAP	Retail Price
66850-A-KIT	ExRings 1.6" (Dual MOA Setting)	\$230
